

knowledge collaboration

**DELFT NL 25-29 OCT** & learning  
for sustainable innovation

Bringing together the 14th *European Roundtable on Sustainable Consumption and Production (ERSCP)* conference and the 6th *Environmental Management for Sustainable Universities (EMSU)* conference in Delft, the Netherlands, on October 25–29, 2010

The ERSCP-EMSU 2010 conference is a joint effort of Delft University of Technology, The Hague University of Applied Sciences and TNO.

knowledge collaboration  
**DELFT NL 25-29 OCT** & learning  
 for sustainable innovation

## SCOPE

To put an end to the traditional light bulb and its environmental impact and to change the way it has been used in society for a very long time not only requires new innovative technologies, but also the collaboration of various stakeholders and actors. New innovations must lead to sustainable consumption and production through attractive products and services that are accepted by society and adopted by end-users, both in developing and developed countries.

## FOCUS

- > How can we bring about sustainable consumption and system innovations?
- > How can higher education facilitate sustainable innovation practices?
- > How can we improve the collaboration between users, society and researchers?
- > What can be done for sustainable innovation at a regional level?
- > What can the North learn from the South with regard to sustainable innovation?

## THEMES

1. Sustainable Universities and Higher Education
2. Sustainable Innovation, Design, Business and CSR
3. Sustainable Consumption and Production
4. Climate, Energy and Water
5. Sustainable Cities and Regions
6. Sustainable Consumption and Production in Developing Countries
